Project Description	A user-friendly website displaying the most common interview questions within a company depending on the role, level, and interview type (System Design, Behavioral, Technical, etc). The data within the website is completely provided by the users of the system.
Motivation	The interview process is stressful and confusing for many new hires as well as experienced hires. Thus, we want to assist in the process by providing a one-stop shop for all interview related questions. There are sources currently available such as Glassdoor to obtain interview questions; however, the questions are difficult to view easily as they are hidden within other reviews. Given the time constraint that many people face, we would like to make it as easy as possible for users to collect the interview questions they may get.
Group Member Responsibility	Chloe Lee: 1.4, Project scheduling, cost/effort/pricing estimation, Presentation Slides Hudson Apel: Class Diagram Hyrum Moses: Test Plan/Unit Test Code Justin Tran: Sequence Diagram Noah Wohler: Use case diagram, comparison w/ similar designs and conclusion Dang Thien Nguyen: 1.5, Presentation Slides Esteban Kim: 1.3, Architectural Design, Management
