

PROJECT PLAN SCOPE – DELIVERABLE 1

Gateway

PROJECT OBJECTIVES

A user-friendly website displaying the most common interview questions within a company depending on the role, level, and interview type (System Design, Behavioral, Technical, etc.). The data within the website is completely provided by the system users.

The system is limited to only interview questions; however, it is for an indefinite number of companies and an indefinite amount of interview questions per company.

List of Project Features.

FEATURES NO.		DESCRIPTION
1		View
	1.1	The main page is a single-page user view containing the most common/upvoted interview questions.
	1.2	Filter option according to company, interview type, role, level
	1.3	Ability to sign up using Google and Yahoo mail
	1.4	. Ability to log in and logout
2		Post
	2.1	Users can add comments on an interview question through a thread.
	2.2	Users can add comments on a thread within an interview question.
	2.3	Users can upvote and downvote on an interview question if logged in.
3		Other (Optional) Users are navigated to a different page that contains a list of companies and links.
